

Second Edition – No.1

September 25, 2003

My name is Bob Barefoot. Many of you have seen me on television, heard me on the radio or on my audio tapes, or you may have read my books on the subject of coral calcium and its health benefits. Many of you believed that I was either dead or in jail as on June 10, 2003, the Federal Trade Commission, FTC, filed a preliminarily injunction against me, Kevin Trudeau and others. That action virtually destroyed me economically and did serious damage to my reputation Although the complaint contained only accusations with the accused is supposedly being innocent until the courts rule otherwise, in reality any FTC target is deemed guilty until he can prove himself innocent, a feat that usually requires millions of dollars. The claims made against me by the FTC were unfounded. Outside of a court of law they would be considered defamatory. However, as an examination of the text of the show will show. This has been done by three independent consulting groups, all of whom found me to be innocent of all charges made by the FTC. The problem is that employees of the FTC are protected by the government despite their guilt. In other words the FTC is allowed to bypass the American system of justice. This of course was never the intent of Congress which gave the FTC these sweeping powers, as it is totally un-American. However, Despite the efforts of the FTC, I am back on radio, television and in the news. I have written three new books, one of which, “The Disease Conspiracy, The FDA Suppression of Cures” exposes the FDA and FTC for being responsible for the deaths of millions of Americans, and for committing racial prejudice against Black America. Because of my Fifth Amendment rights, I am allowed to tell the story, and I have done so in the book and on my new infomercial.

My message for America is that the scientific community has proven that mineral supplements, especially calcium, and vitamins, especially vitamin-D, can indeed both prevent and cure diseases such as cancer, Lupus diabetes, etc.. I personally have been studying biological calcium for about 40 years now, long before it became a popular subject. And for that reason many seek out my council on this important subject. I also have sold and endorsed my

own brands of coral calcium, i.e., CORAL CALCIUM SUPREME™, BOB'S BEST CORAL CALCIUM™, and BAREFOOT'S CORAL CALCIUM COMPLETE as well as other brands that I believe to constitute high quality marine coral calcium.

Calcium is an essential nutrient in our daily diet and is a key factor in a wide range of biological systems within the body. Its role in disease prevention and treatment has been studied, and continues to be studied, by numerous scientists around the world. A search on the US National Library of Medicine's PubMed system reveals more than 17,000 scientific articles on calcium and its relationship to cancer. In particular, clinical trials have examined the link between calcium consumption and its positive effects on colorectal cancer, one of the most common cancers in Canada (the Canadian Cancer Society estimates that this year 18,000 Canadians will be diagnosed with colorectal cancer and 8,300 will die from it). While the study of calcium continues, its importance is becoming widely recognized even among the more conservative members of the scientific and medical communities. The 2001 "Physicians Desk Reference for Nutritional Supplements'" chapter on calcium states that calcium has anti-osteoporotic activity and may also have anti-carcinogenic, antihypertensive and hypocholesterolemic activity. In Barefoot's opinion, the best calcium nutrient in the world is marine coral calcium from Okinawa Japan. It has an eight hundred year track record with hundreds of millions of people consuming it and so far, no one has died, and there are literally millions of health testimonials. It contains both bio-available calcium and bio-available magnesium along with 70 other trace mineral nutrients, all of which the body needs. In addition it contains marine microbes that dramatically enhance the body's ability to absorb nutrients in the intestine. Lastly, coral calcium was made by God !!!
